

Curriculum Vitae: Inspection Engineer / Data Recorder 3.4u CSWIP**Personal Particular**

Name : Muhammad Amin bin Azman
Nationality : Malaysian
Date of Birth : 17th February 1987
Marital Status : Married

**Additional Information**

3.4U Inspection Engineer : Since 25 Oct 2023 Duration: 2years 2months
Identity Card (Malaysian) : 870217-02-5591
Passport No. : A70360403 Validity: 13th March 2029
Seafarers' Identity Document : 202423017202 Validity: 20 Mar 2029

Educational Qualifications & Grades

- Bachelor of Engineering (Petroleum) - CGPA: 3.44 Issued : 25 Sep 2010

Professional Training & Qualification

- Underwater Inspection Controller 3.4U - Cert No: 542968 Issued : 24 Oct 2023
Valid : 25 Jul 2028
- Petronas Competency Card - Cert No: CCC20240045814 Issued : 19 Oct 2024
Valid : 13 Mar 2026
- Petronas Offshore Safety Passport - Cert No: OSP20240040915 Issued : 19 Oct 2024
Valid : 16 Sep 2026

Safety Training Courses and Medical

- Petronas MPM Offshore - Klinik Berkas Sentral Issued : 17 Sep 2024
Valid : 16 Sep 2026
- OGUK / OEUK - Klinik Berkas Sentral Issued : 17 Sep 2024
Valid : 16 Sep 2026
- ADNOC Medical - OHMC, Dubai UAE Issued : 28 Oct 2025
Valid : 27 Oct 2026
- ADNOC Offshore HSE Induction - GTSC, Dubai UAE Issued : 31 Oct 2025
Valid : 30 Oct 2027

- BOSIET with EBS and Travel Safely By Boat - No: 2908570702122213402 Issued : 2 Dec 2022
- Opito Course Code: 5707 Valid : 1 Dec 2026
- BOSIET with CA-EBS - No: 2908575002122213404 Issued : 2 Dec 2022
- Opito Course Code: 5750 Valid : 1 Dec 2026
- Basic H2S Training - No: OPITOE8YnkGsH1f Issued : 28 Oct 2025
- Opito Course Code: 9014 Valid : 27 Oct 2027
- Mercury Awareness (Adaptive) By RelyOn - No: 11127173 Issued : 04 June 2025
- Course Code: CLBSADL012 Valid : 03 June 2027

Skills Acquired and other trainings

- Petronas PCSB PTW Level 1 - Awareness Issued : 14 Oct 2024
Valid : 13 Oct 2027
- VOYIS Live Discovery Training under Fugro Dubai Training for Voyis Discovery, VSLAM Acquisition & Agisoft Photogrammetry Attended on : 25 Nov 2025
- FDVR & Sense Structures Data Acquisition under Fugro Dubai Attended on : 17-21 Dec 2025

EMPLOYMENT HISTORY AND WORK DESCRIPTION

Duration : 18 August 2025 – 26 August 2025
 Company : Tanjung Offshore Services Sdn Bhd
 Client : RINA Malaysia Sdn Bhd
 Position : Data Recorder
 Location : T7 Elise MOPU (4 Legged), Bayan Field, SKA Sarawak Water, Malaysia
 Job Description : Performed subsea intermediate inspection for Class & Statutory Certification for Permanent Offshore Installation by RINA Malaysia using SEAMOR ROV Chinook with real-time data capture via Sirrihatt Inspection Suite.
 Nature of Work : T7 Elise MOPU jack-up legs inspection: Performed GVI & UT wall thickness survey on the MOPU structure.

Duration : 24 June 2025 – 11 August 2025
 Company : Sirrihat Subsea Services Sdn Bhd
 Client : Technip MMHE Join Venture
 Position : Data Recorder
 Location : KSCPP & KSDP-A Platforms, Kasawari Field, SKA Sarawak Water, Malaysia

Job Description	: Performed baseline platform inspections using ROV Oceanus Pro Defender & ROV Videoray Defender, with real-time data capture via Sirrihatt Inspection Suite. Conducted FMD survey on all structural members utilizing Impact Subsea FMD Oceanscan.
Nature of Work	: Kasawari Platforms Baseline Inspection: Performed GVI, CVI, anode inspections, caisson and conductors inspection, and riser/support clamp assessments on the platform structure.

Duration	: 26 January 2025 – 21 March 2025
Company	: Sapura Subsea Services
Client	: PTTEP Sarawak Oil Limited
Position	: Data Recorder
Vessel	: Sapura Conquest
Location	: SKA Sarawak Water, Malaysia
Job Description	: Conducted subsea inspections using Air Dive and WROV (SMD Atom A6) with real time reporting via the Sirrihatt inspection suite.
Nature of Work	: Scope of work involved inspection of offshore platforms (PE-SA, BE-SA, SA-SA), monitoring of FSO propeller and clamp installations for leaks, supervision of anchor wire cutting and retrieval operations, and verification of subsea valve isolation status.

Duration	: 23 October 2024 - 28 November 2024
Company	: Alam Maritim Resources Berhad
Client	: Petronas Carigali Sdn Bhd
Position	: Data Recorder
Vessel	: Meo Resolution
Location	: SKA Sarawak Waters, Malaysia
Job Description	: Performed subsea inspections using WROV Jerung 01 & Seaeye Tiger, with real-time data capture via OBS Studio and IDAMS Winair.
Nature of Work	: Conducted major platform inspections (TEDP-B, TEJT-C, BNP-B, BN14) and pipeline inspections (SKAPL329, 397, 400, 220).

Duration	: 9 October 2024 -19 October 2024
Company	: KL Petrogas Sdn Bhd & Surya Nautika
Client	: Carigali Hess Operating Company Sdn Bhd
Position	: Data Recorder
Vessel	: Mermaid Sapphire
Location	: MTJDA Malaysia – Thai Water
Job Description	: Performed subsea inspections using WROV Quasar 06, with real-time data capture via Sirrihat Inspection Suite.
Nature of Work	: Supervised debris removal (B11DR-A), jack-up approach monitoring, and subsea footprint surveys in Malaysia–Thailand Joint Development Area.

Duration	: 21 August 2024 - 6 September 2024
Company	: T7 Global Bhd
Client	: Petronas Carigali Sdn Bhd
Position	: Data Recorder

Vessel : AWB Petra
 Location : Dulang PMA Terengganu Water, Malaysia
 Job Description : Performed subsea inspections using ROV Argos, with real-time data capture via Sirrihatt Inspection Suite.
 Nature of Work : PMA Dulang Major Platform Inspection: Performed GVI, CVI, anode inspections, caisson and conductors inspection, and riser/support clamp assessments on the platform structure.

Duration : 13 June 2024 - 6 July 2024
 Company : T7 Global Bhd
 Client : Petronas Carigali Sdn Bhd
 Position : Data Recorder
 Vessel : AWB Perdana Excelsior
 Location : ERB West Field, Sabah Water, Malaysia
 Job Description : Performed subsea inspections using ROV Chinook, with real-time data capture via Sirrihatt Inspection Suite and IDAMS Winair.
 Nature of Work : Inspected ERB West field (EWDP-Gas Platform), including GVI, CVI, anode, caisson & conductors, and riser/support clamp inspections.

Duration : 16 April 2024 - 1 June 2024
 Company : T7 Global Bhd
 Client : Petronas Carigali Sdn Bhd
 Position : Data Recorder
 Vessel : SK Marco Polo
 Location : ERB West Field, Sabah Water, Malaysia
 Job Description : Performed subsea inspections using ROV Chinook, with real-time data capture via Sirrihatt Inspection Suite and IDAMS Winair.
 Nature of Work : Carried out major platform inspections at ERB West (EWDP-Production Platform), covering GVI, CVI, anode, caisson & conductors, and clamp inspection tasks.

Start Date : 1 November 2023
 Company : Sirrihat Subsea Services Sdn Bhd
 Position : 3.4U Inspection Engineer
 Company Address : 5 Jalan TP7/6, Taman Perindustrian Sime UEP, Subang Jaya, Selangor 47620, Malaysia
 Job Description :
 • Final reporting – converting rough daily logs from offshore into polished & formal client reports
 • Data QA & QC – Verifying accuracy of video footage, timestamps and anomaly descriptions against the logs
 • Database management – uploading validated data into integrity software systems
 • Drawing updates – Marking up CAD or “Ass-built” drawings to reflect new findings
 • Work pack creation – writing detailed, step-by-step inspection procedures & checklists for upcoming projects
 • Desktop studies – reviewing historical reports to identify what specific areas need monitoring in future campaigns

FAMILIAR WITH THE FOLLOWING EQUIPMENT AND SOFTWARE:

Inspection Suite	:	Fugro DVR, Fugro Sense Structures Data Acquisition Software, VOYIS Discovery, VSLAM Acquisition & Agisoft Photogrammetry, OBS Studio, Sirrihatt SirOnline, IDAMS WinCairs
NDT	:	ISIS & IICORR - CP Logging and Processing, Buckleys Bathycorrometer CP, FMD – Gamm@scan, Impact Subsea FMD Oceanscan, Underwater MPI, GVI, CVI, Cygnus UT Thickness Gauge, Welding Inspection, RT /MT/ PT/ UT.
Administration	:	MS Office (Word, Excel, PowerPoint, Access, Visio, & Project)
Audio / Video	:	Video networks including distributors, Cameras, multiplexers, & Audio equip.
CAD	:	AutoCAD 2D, 3D, SketchUp

DUTIES AND RESPONSIBILITIES SUMMARY**Underwater Inspection, Repair & Maintenance**

- Project management and client liaison for offshore inspection/repairs projects.
- NDT methods and procedures for topside and underwater applications.
- Extensive practical, field experience, including underwater installations inspection tools application.
- Project & Inspection Planning
- Collate Field Data for report writing
- Baseline Surveys & Inspections of Offshore Structures
- Inspection, Maintenance & Repairs of Offshore Structures
- Pipeline Inspection and Repairs
- Pipeline free span corrections

Pipeline - Offshore

Extensive experience in offshore pipeline inspection, ensuring subsea infrastructure integrity through detailed assessments. Proficient in conducting inspections utilizing both ROV technology and air diving methods. Operational expertise includes general pipeline inspection, gooseneck & spool, flanges, pipeline sleepers & buckling initiators, subsea valve isolation, installation and monitoring of encapsulation clamps, de-oiling and leak detection protocols, and critical removal of obstructions such as anchor wires posing a risk to pipeline integrity.

Jacket Structure - Offshore

Oversaw comprehensive planning, execution, and reporting of Non-Destructive Testing (NDT) and visual examinations on offshore jacket structures. Executing tasks as stated in the work packs, ensuring strict adherence to project specifications, relevant industry standards, and safety regulations. Conducted diverse NDT techniques including Cathodic Protection (CP) surveys, Ultrasonic Testing (UT), Flooded Member Detection (FMD), Alternating Current Field Measurement (ACFM), and Magnetic Particle Inspection (MPI). Performed risk assessments and managed significant debris removal utilizing both WROV and air dive methodologies. Critically evaluated inspection findings, accurately recorded results, and generated detailed, auditable reports, and delivered high-quality inspection data, facilitating informed decisions regarding the structural integrity and safe operation of subsea jacket installations.

Structure (Fabrication of jacket and module) - Onshore

Supported project planning and scheduling. Monitored progress and reported updates. Coordinated between fabrication, welding, and quality control. Managed project documentation. Ensured adherence to technical specifications and project requirements. Provided technical support to fabrication projects. Reviewed technical drawings and specifications. Assisted in quality assurance implementation, ensuring adherence to industry standards. Supported technical query resolution. Contributed to maintaining high-quality standards. Facilitated communication between teams and stakeholders. Gained valuable oil and gas industry experience in offshore structure construction within a dynamic yard environment.
