

Appraisal and Project Summary

Appraisal and Reference Letter

To Whom It May Concern,

Subject: Letter of Recommendation - Muhammad Amin bin Azman

It is a pleasure to provide this appraisal for Muhammad Amin bin Azman. Amin has served as a 3.4U Inspection Engineer / Data Recorder, consistently delivering high-quality technical results across a variety of demanding subsea IRM (Inspection, Repair, and Maintenance) campaigns.

Campaign and Project Experience:

- Major Platform and Baseline Inspections: Conducted comprehensive GVI, CVI, and NDT inspections in the Kasawari, Dulang, and ERB West fields.
- Class and Statutory Certification: Performed subsea intermediate inspections on jack-up legs for MOPU structures to meet rigorous Class requirements.
- Pipeline Integrity: Executed detailed pipeline inspections and assessments, including free span corrections and leak detection protocols, across various SKA Sarawak and Terengganu waters.
- Specialized Subsea Tasks: Experienced in supervising complex operations such as anchor wire retrieval, subsea valve isolation, and debris removal from vessels like the Sapura Conquest and Mermaid Sapphire.

Technical Expertise:

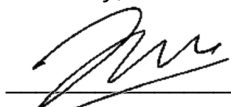

- Software: Expert-level user of Sirrihatt (SirOnline), Fugro DVR, and SenseStructures.
- NDT Proficiencies: Highly proficient in Cathodic Protection (CP) logging, Ultrasonic Testing (UT), and Flooded Member Detection (FMD) utilizing Impact Subsea technology.
- Next-Gen Tech: Recently trained in VOYIS Discovery, VSLAM Acquisition, and Agisoft Photogrammetry through Fugro Dubai.

Professional Standing:

Amin holds a CSWIP 3.4U certification (Cert No: 542968) and a B.Eng in Petroleum Engineering. He maintains all necessary offshore safety credentials, including BOSIET with CA-EBS and Petronas OSP, and is ready for immediate international mobilization.

His technical rigor, reliability, and extensive field experience make him an outstanding candidate for any subsea inspection team. We highly recommend him for his professionalism and technical competence.

Sincerely,

(Signature and Stamp)

Appraisal and Project Summary

Subsea Inspection Campaign History

Period	Company/Client	Field/Location	Vessel/Asset	Position/Scope
Oct-Dec 2025	Fugro / ADNOC	Dubai (ROC)	Fugro ROC	Data Recorder: VOYIS, VSLAM, Photogrammetry; Project Lightning work pack review.
Aug 2025	Tanjung / RINA	Bayan Field	T7 Elise MOPU	
Jun-Aug 2025	Sirrihat / Technip	Kasawari Field	KSCPP & KSDP-A	Data Recorder: Intermediate inspection for Class/Statutory; GVI & UT wall thickness survey.
Jan-Mar 2025	Sapura / PTTEP	SKA Sarawak	Sapura Conquest	
Oct-Nov 2024	Alam Maritim / Petronas	SKA Sarawak	Meo Resolution	Data Recorder: Baseline platform inspections (GVI, CVI, FMD) using ROV.
Oct 2024	KL Petrogas / Hess	MTJDA Waters	Mermaid Sapphire	
Aug-Sep 2024	T7 Global / Petronas	Dulang Field	AWB Petra	Data Recorder: Air Dive & WROV; inspections of PE-SA, BE-SA, SA-SA platforms.
Jun-Jul 2024	T7 Global / Petronas	ERB West Field	Perdana Excelsior	
Apr-Jun 2024	T7 Global / Petronas	ERB West Field	SK Marco Polo	Data Recorder: WROV subsea inspections; major platform/pipeline integrity.
				Data Recorder: WROV Quasar 06; debris removal, jack-up approach, footprint surveys.
				Data Recorder: Major platform inspection (PMA Dulang); GVI, CVI, anode, caisson/conductor.
				Data Recorder: ROV Chinook inspections of EWDP-Gas platform; GVI, CVI, riser/clamp.
				Data Recorder: Major platform inspections (EWDP-Production); data capture via Sirrihatt/IDAMS.
